ZÁÉV zrt

## Country

Hungary

## Location

Balatonboglár

When The National Handball Academy needed to install a new **sports floor** had a demand for a high quality sports floor. A Junckers sports floor was chosen after a close cooperation between Junckers Technical Department and The National Handball Academy.

3362 m<sup>2</sup> of SylvaSport Beech in the quality Premium was chosen for this project. The surface was treated with Silk Matt lacquer. The floor was installed on a UnoBAT 45.

The UnoBat 45 undercarriage system has the world's lowest construction height for A4 high performance **sports floors** installed on batten constructions. UnoBat 45 is also very easy and fast to install making it possible to keep down both costs and building time.
